

## Aluminium Extrusions - AL-7

Teucer aluminium extrusions are vital to any LED strip installation and are designed to act as a heat sink which allows for heat to be dispersed away from vital components and into the aluminium housing helping to cool down the LED strip. All types of LED strip may overheat when in use over long periods of time. This is the most common cause of premature product failure and the product peeling off from its installed surface area.

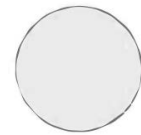

Choose from a number of extrusions to suit your desired finish and lighting effect. These products are designed to make your installation look good and longer lasting.

Teucer aluminium extrusions are made from a 6063 aluminium alloy; due to its anti-corrosive resistance, good heat retention and workable properties, it ensures an easy but durable installation.

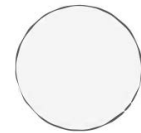

Our diffusers are made from polycarbonate, allowing them to be cut with ease and not crack as is commonly associated with other materials.

### Diffuser Type

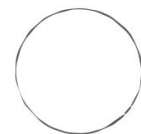

OPAL

FROSTED

CLEAR

### Extrusion & Diffuser available lengths

Bespoke lengths manufactured to order in the UK with fast delivery times. LED Strip can also be fitted to produce a complete plug and play LED light bar via our Teucer customisation service. (max length of 200cm)

## Aluminium Extrusions

# AL-7

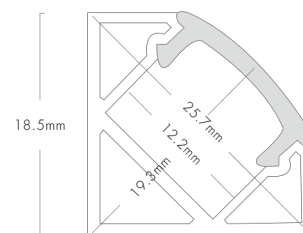

### EXTRUSION TYPE

90 degree surface mounted aluminium extrusion, suitable for single row LED strip.

### ACCESSORIES

Each meter of AL-7 comes with 2 mounting clips + 2 end caps as standard.

For additional units, use order code:  
AL-7/CLIP

ORDER CODE	LENGTH	DIFFUSER	CONSTRUCTION
AL-7/2M	2 meter	n/a	Aluminium Extrusion
DIF-7C/2M	2 meter	Clear	Polycarbonate Diffusers
DIF-7F/2M	2 meter	Frosted	Polycarbonate Diffusers
DIF-7O/2M	2 meter	Opal	Polycarbonate Diffusers
