

XTS

The new HD video monitor from CAME

THE XTS CONCEPT

“Our goal was to build the very best video entry receiver in the market,
with no compromises!

The components, build quality and software flexibility needed to set a new
standard and surpass any product we have ever built before.

We have certainly achieved this with XTS.”

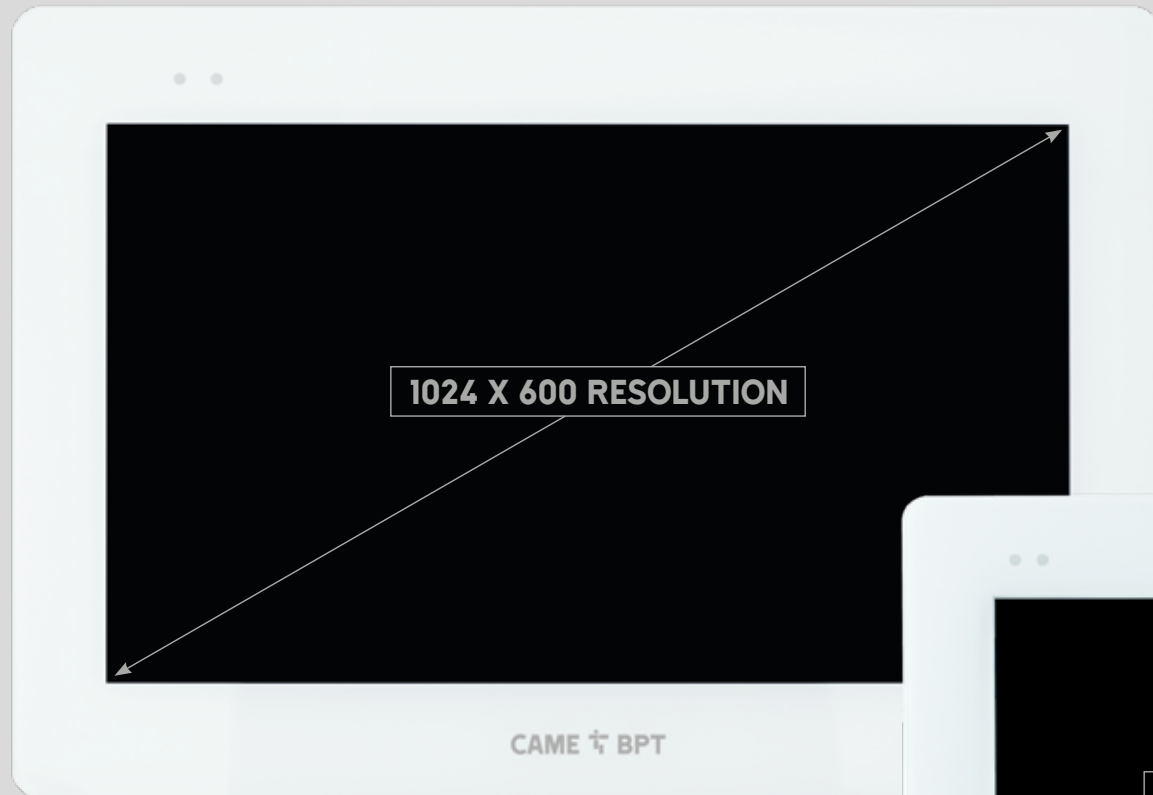

Paolo Menuzzo
CAME President

THE NEW XTS TOUCH SCREEN MONITOR HAS ARRIVED

7" Monitor

185mm x 125mm

Both sizes are
available in black

5" Monitor

138mm x 98mm

MOUNTING OPTIONS

RECESS-MOUNTED

12MM SURFACE PROTRUSION

The XTS monitors elegant and ultra slim design fits discreetly into any environment.

MAGNETIC FITTING SYSTEM

To make installation simple and quick, XTS uses a series of powerful mini magnets to securely hold the monitor to the desired bracket (surface or recessed mounted).

SURFACE MOUNTED

24MM

XTS has been designed to make minimal impact and complement its surroundings. The total depth of the unit is only 24mm when wall mounted.

MAGNETIC FITTING SYSTEM

To make installation simple and quick, XTS uses a series of powerful mini magnets to securely hold the monitor to the desired bracket (surface or recessed mounted).

TABLE MOUNT

An understated and sleek table mount is available, allowing the XTS to be used in any application.

THE TECHNOLOGY

STATE OF THE ART OPTICAL BONDING

Inspired by the desire to produce the highest quality video entry product available, XTS incorporates the latest cutting edge video touch screen technology.

The optical bonding process increases strength whilst reducing ambient reflected light, eliminating environmental glare and dramatically increasing the contrast ratio of the display.

XTS is the first video entry monitor to employ this ground breaking innovation.

BONDED GLASS

INCREASED STRENGTH

IMPROVED DURABILITY

RESISTANCE TO FOGGING

EXTENDED TEMPERATURE
RANGE AND EMI FILTERING

BONDED

UNBONDED

SOFTWARE FEATURES

DISCRETE VIDEO RECORDING DURING A CALL

Want added security and peace of mind? At the touch of the button, XTS can record audio and video from the call in progress.

CCTV INTEGRATION

Own an IP CCTV system and want to access live images easily and conveniently? Integrate them into XTS for full visual security at the touch of a screen.

VIDEO VOICEMAIL

Expecting an important delivery and don't want to be disturbed? Simply enable the automated video voicemail and record an outgoing message. You can review your saved audio and video footage of the call later, at your convenience. Video messages are stored to the internal memory of the monitor and streamed directly to your smartphone via a push notification from the VideoEntry app, meaning no video footage is stored in the cloud*.

SOFTWARE FEATURES

CHANGE YOUR COLOUR SCHEME

When using the tiled menu structure, different background colour schemes can be selected by the user to easily change the appearance of the XTS interface.

MISSED CALL NOTIFICATION

Need to know if someone tried to contact you? XTS will provide a missed call log showing the dates and times. Even when the monitor is in standby, an LED will illuminate to alert the user with a missed call notification when the screen is not active.

AUTOMATIC DOOR OPENING

Having a party and don't want to keep having to get up to let everyone in? Activate the auto open feature on XTS and next time the call button is pressed the gates will open automatically (similar operation to a 'trades timer' function).

FULLY CUSTOMISE YOUR XTS EXPERIENCE

The XTS graphic user interface software will allow the system installer to customise the screen like never before. This unique feature is available on all XTS IP monitors.

Home and operational screens can be personalised with any background image, custom buttons and layout design imaginable. Unused function buttons can be removed to simplify the user experience, background images and custom button graphic sets can be imported to make each installation truly unique.

Function buttons can be assigned to any action and any image can be used as a function. Load in an image of the actual entrance and press that image to activate the camera preview. Change the page order and layout to suit the installation when swiping between screens.

Design schemes can be applied to individual monitors, or a shared scheme can be applied to a whole building incorporating logos or complementary colour palettes. Give each floor of a building a unique design, offer the penthouse an exclusive interface with additional features, the possibilities are endless with XTS.

Schemes (including function button operations) can be pre-designed and saved to be imported later. Contact details or maintenance company details can be set as the background image in industrial or commercial settings.

The only limitation of XTS is your creativity.

UNLIMITED WALLPAPER OPTIONS

BESPOKE BUTTON SIZES

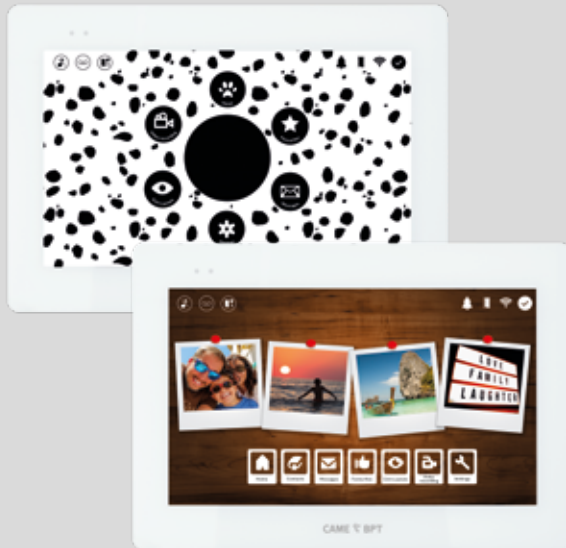

VARIABLE LAYOUT OPTIONS

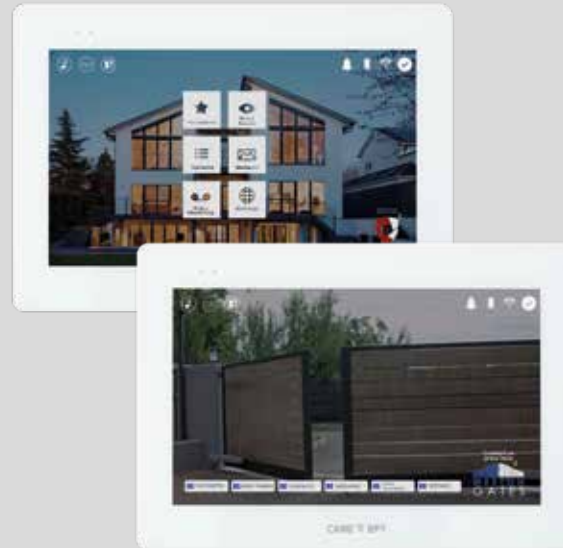

BESPOKE DESIGNS

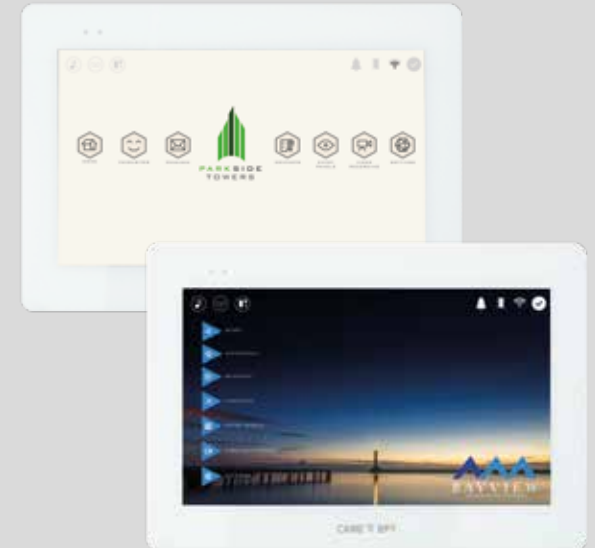

RESIDENTIAL EXAMPLES

INSTALLER EXAMPLES

COMMERCIAL EXAMPLES

CREATE TOTALLY BESPOKE MENUS:

Customise buttons: designs, sizes, colours, placement.

Upload bespoke background images: e.g blend to the apartment colour scheme, incorporate the developers logo, family photos or even include your logo and contact details for call outs. The list of possibilities is endless.

USE YOUR OWN WIFI TO CONNECT TO XTS

You can use the home connection to bring the video intercom on to the network, at no extra cost.

XTS is equipped with a WiFi card and with a simple configuration can be connected to the internet.

In this way you can use the video door entry system remotely via your smartphone or tablet.

ROUTER

The device, equipped with a WiFi card, can be hooked up to your own home router and take advantage of the home network to connect to the internet.

CAME CONNECT

It is the Cloud Technology platform that allows you to remotely manage the system guaranteeing maximum security levels.

INTERNET

The internet connection, exploiting the home network, does not incur any additional costs on top of your network provider subscription.

4 LICENSES INCLUDED

Each internal derivative XTS includes 4 app licenses to record as many mobile devices.

REMOTE MANAGEMENT BY SMARTPHONE

REMOTE MANAGEMENT

- Receive calls on your smartphone
- Open your door
- Switch on your lights
- Control your cameras
- Call your house
